**FROM THE NEWSWIRE**

**MONTREAL:** In support of Immunization Awareness Week 2014, Vaccines411TM has created an immunization brochure for the general public asking: Are your immunizations up-to-date? The goal is to encourage patients to talk to their healthcare professionals about which vaccines they may need.

**OTTAWA:** A record number of graduating students and physicians matched to residency training programs in Canada this year, the Canadian Resident Matching Service (CaRMS) announced. A total of 3,255 graduating students and physicians were matched in the 2014 R-1 Main Residency Match and will begin their postgraduate training on July 1, 2014.

**OTTAWA:** The poorer you are the more it costs to stay healthy. That's the conclusion of a Statistics Canada study released — and also validation of arguments that poverty is a health issue just as it is an economic one, the Canadian Medical Association (CMA) said. As a percentage of after-tax income, out-of-pocket spending on health care was greater in lower-income households, said the StatsCan study of prices between 1997 and 2009. In 2009, out-of-pocket spending on health care represented 5.7% of total after-tax income in households at the bottom of the income grid, compared with 2.6% at the top of the income scale.

**OTTAWA:** Further to a public communication issued April 5, 2014, Fresenius Medical Care is expanding its voluntary recall to include additional lots of "NaturaLyte Sodium Bicarbonate Liquid Concentrate" in 6.4L and 8L volumes. The recall of this product is due to bacterial contamination.

**TORONTO :** Health Minister Rona Ambrose learned first-hand the challenges of delivering healthcare in a busy urban hospital. The Minister joined medical residents at St. Joseph's Health Centre in Toronto by spending time with them as they delivered frontline care. In addition, the Minister also discussed a range of issues, such as patient care, patient safety and health human resources, with the future physician specialists.

**OTTAWA:** Four unauthorized drugs being sold at two SVN FUEL stores - one in Burnaby and one in Coquitlam, B.C. - were seized by Health Canada as they contain ingredients that are potentially dangerous to the health of consumers. The products, and the unapproved ingredients they contain, include Jack3d (DMAA (1, 3-dimethylamylamine), Red Rockets (ephedrine and caffeine), West Pharm Therma Lean (ephedrine and caffeine), and OxyElite Pro (1, 3-dimethylamylamine HCl and Yohimbe Bark extract). They were being promoted for weight management.
