FROM THE NEWSWIRE

KIRKLAND, QC: Merck, known as MSD outside the United States and Canada, has announced that GARDASIL^{®9} (Human Papillomavirus 9-valent Vaccine, Recombinant), Merck's 9-valent human papillomavirus (HPV) vaccine, is now available in Canada. GARDASIL^{®9} is indicated for use in girls and women 9 to 45 years of age for the prevention of cervical, vulvar, vaginal, and anal cancers caused by HPV types 16, 18, 31, 33, 45, 52 and 58, pre-cancerous or dysplastic lesions caused by HPV types 6, 11, 16, 18, 31, 33, 45, 52, and 58, and genital warts caused by HPV types 6 and 11. GARDASIL^{®9} is also approved for use in boys and men 9 to 26 years of age for the prevention of anal cancer caused by HPV types 16, 18, 31, 33, 45, 52 and 58, precancerous or dysplastic lesions caused by HPV types 6, 11, 16, 18, 31, 33, 45, 52 and 58, and genital warts caused by HPV types 6 and 11. GARDASIL^{®9} is contraindicated in individuals with hypersensitivity, including after a previous dose of GARDASIL^{®9} or GARDASIL[®] [Quadrivalent Human Papillomavirus (Types 6, 11, 16, 18) Recombinant Vaccine].

OTTAWA: Canada's Research-Based Pharmaceutical Companies (Rx&D) acknowledges the Patented Medicines Prices Review Board's (PMPRB) newly released report on Cost Drivers of Public Drug Plans in Canada. Rx&D notes that, according to the report, the rates of change in drug costs have been steadily declining in recent years, reaching a low of -0.8 percent in 2012/13 for a number of select public drug plans. But Rx&D cautions that any study that examines the costs of medicines without considering their overall impact on the system and how they factor in comparison to other costs could lead to inaccurate perspectives or analyses.

OTTAWA: The Honourable Rona Ambrose, Minister of Health, and Canada's Chief Public Health Officer, Dr. Gregory Taylor, have welcomed the news of promising trial outcomes of Canada's VSV-EBOV Ebola vaccine. The results of several studies and trials bring the world closer to ending this global outbreak through the provision of a commercially available vaccine.
