FROM THE NEWSWIRE

MONTREAL: inVentiv Health Clinical, a leading global supplier of drug development services, has announced its support of an unrestricted grant in pharmacometrics submitted by the University of Montreal to the Industrial Research Chair Grant Program of the National Science and Engineering Council of Canada (NSERC). The grant serves to support the growth of an emerging scientific field that has the potential to improve drug development.

BELLEVILLE, ON: Bioniche Life Sciences Inc. has announced that it is targeting Q1/2015 for the filing of a Biologics License Application (BLA) with the United States Food and Drug Administration (FDA) for Bioniche's lead program Mycobacterial Cell Wall-Nucleic Acid Complex (MCNA) for the treatment of patients with high grade non-muscle invasive bladder cancer that have failed Bacillus Calmette-Guérin (BCG) therapy. This projected timeline integrates the conclusions of a regulatory gap analysis prepared by its consultants (reviewing the state of each BLA module and estimating the time to complete) with the planning and scheduling of a pre-BLA meeting between Bioniche and the FDA prior to the BLA filing.

OTTAWA: Dr. Chris Simpson was installed as president of the Canadian Medical Association (CMA) during the association's 147th annual meeting in Ottawa. Dr. Simpson succeeds Dr. Louis Hugo Francescutti, an emergency and preventive medicine physician from Edmonton. "I strongly believe that Canada's doctors need to recognize and embrace our accountability to the public. We have a social contract with Canadians to serve not only our individual patients, but society as well," said Dr. Simpson.
