FROM THE NEWSWIRE

TORONTO: Bayer Inc. announced the approval of Adempas® (riociguat tablets) for treating patients with a form of heart and lung disease called pulmonary arterial hypertension (PAH). Adempas is currently the only treatment approved for use in two rare types of pulmonary hypertension (PH) – PAH and chronic thromboembolic pulmonary hypertension (CTEPH).

BLAINVILLE, QC: Duchesnay Inc., a pharmaceutical company specialized in the development of medications to be used during pregnancy and breastfeeding, is pleased to announce that its prescription product Diclectin® indicated for nausea and vomiting of pregnancy (NVP) has received Kosher and Passover certification from the Kashruth Council of Canada (COR). The same product has also received Halal certification from the ISNA Halal Certification Agency.

TORONTO: Chronic rhinosinusitis (CRS; also known as chronic sinusitis) affects an estimated one in fourteen (7%) Canadians, making it one of the most frequent inflammatory diseases in the general population. The economic burden of CRS on Canadian health care resources is considerable, with direct costs of medication, doctor visits and surgery assessed at approximately \$860 million annually.

LUND, Sweden: BONESUPPORT, an emerging leader in injectable bone substitutes for orthopedic trauma, bone infections and instrument augmentation related to orthopedic surgery, together with the University of Mainz in Germany, announced that the protocol for the CERAMENT™|Tibia Fracture Study (CERTiFy) was recently published in TRIALS, an open access, peer reviewed online journal. CERTiFy is a controlled, prospective, randomized clinical trial comparing the use of CERAMENT™|BONE VOID FILLER with the current gold standard for bone graft procedures in the management of tibia plateau fractures. CERTiFy will include 136 patients from more than a dozen top orthopedic trauma centers in Germany.
